Unsafe Harbor

- This room is an unsafe harbor
- You can rely on the information in this presentation to help you protect your data, your databases, your organization, and your career
- No one from Oracle has previewed this presentation
- No one from Oracle knows what I'm going to say
- No one from Oracle has supplied any of my materials
- Everything I will present is existing, proven, functionality

Introduction

Daniel Morgan

- ♣ Oracle ACE Director Alumni
 - Oracle Educator
 - 🏛 Curriculum author and primary program instructor at University of Washington
 - 🏛 Consultant: Harvard University
 - University Guest Lecturers
 - APAC: University of Canterbury (NZ)
 - EMEA: University of Oslo (Norway)
 - Latin America: Universidad Cenfotec, Universidad Latina de Panama, Technologico de Costa Rica
 - IT Professional
 - First computer: IBM 360/40 in 1969: Fortran IV
 - Oracle Database since 1988-9 and Oracle Beta tester
 - The Morgan behind www.morganslibrary.org
 - Member Oracle Data Integration Solutions Partner Advisory Council
 - Vice President Twin Cities Oracle Users Group (Minneapolis-St. Paul)
 - Co-Founder International GoldenGate Oracle Users Group
 - Principal Adviser: Forsythe **Meta7**

System/370-145 system console

International Oracle Events 2015-2016 Calendar

Feb Mar Apr May Jun Jul Aug Sep Oct Nov Dec Jan

The Library

The library is a spam-free on-line resource with code demos for DBAs and Developers. If you would like to see new Oracle database functionality added to the library ... just email us. Oracle 12.1.0.2.0 has been released and new features will be showing up for many weeks. The first updates have already been made.

Users

New: 12cR1

AUDSYS
GSMADMIN_INTERNAL
GSMCATUSER
GSMUSER
PDBADMIN
SYSBACKUP
SYSDG
SYSKM

New: 12cR2

APEX_050100
APEX_INSTANCE_ADMIN_USER
APEX_LISTENER
APEX_REST_PUBLIC_USER
DBJSON
DBSFUSER
GGSYS
HRREST
OBE
ORDS_METADATA
ORDS_PUBLIC_USER
PDBADMIN
REMOTE_SCHEDULER_AGENT
RESTFUL
SYS\$UMF
SYSRAC
XDBEXT
XDBPM
XFILES

New Users With Escalated Privs

USERNAME	Usage
GGSYS	The internal account used by Oracle GoldenGate. It should not be unlocked or used for a database login.
SYSBACKUP	This privilege allows a user to perform backup and recovery operations either from Oracle Recovery Manager (RMAN) or SQL*Plus.
SYSDG	This privilege allows a user to perform Data Guard operations can use this privilege with either Data Guard Broker or the DGMGRL command-line interface.
SYSKM	This privilege allows a user to perform Transparent Data Encryption keystore operations.
SYSRAC	<p>This privilege allows the Oracle agent of Oracle Clusterware to perform Oracle Real Application Clusters (Oracle RAC) operations.</p> <p>SYSRAC facilitates Oracle Real Application Clusters (Oracle RAC) operations by connecting to the database by the Clusterware agent on behalf of Oracle RAC utilities such as SRVCTL.</p>

If you don't think this will affect you consider the following

- Oracle 18.0 will be released this Fall with more than 180 new features
 - Oracle has changed `./runInstaller` and OUI to make them more Cloud compatible
- Oracle 18.1 will be released in January
- Oracle 18.2 will be released in April
- Oracle is moving to eliminate SYSDBA
 - We now have users named GGSYS, SYSBACKUP, SYSDG, SYSKM, SYSRAC?
- The Oracle Database on Linux may move to rpms with installation and patching fully automated from a YUM server
- The database's kernel is being rewritten so that almost all patches will not require an outage
- Expect OEM and other tools to manage the database through the REST API
- Do not be surprised if SQL*Plus and Server Control are merged into a single tool and DBAs will be strongly discouraged for using it for everything except troubleshooting and root cause analysis

Oracle Multitenant

Multitenant Business Case

- Database 12c was architected specifically to meet business needs related to the move away from n-tier on-premise deployment to Software Defined Everything
- An architecture able to support multitenant pluggable containers is one that provides
 - Rapid provisioning
 - Application portability
 - Physical and logical customer isolation
 - Granular control
 - Improved scaling and resource utilization
 - Improved security

Create Application Containers

Application Containers Demo 1: Create Application Root (1:12)

```
conn sys@orabase as sysdba
Enter password:
Connected.

sho con_id

CON_ID
-----
      1

show con_name

CON_NAME
-----
CDB$ROOT

SELECT name, open_mode, application_root,
application_pdb, application_seed, pdb_count
FROM v$containers
ORDER BY con_id;
```

NAME	OPEN_MODE	APP	APP	APP	PDB_COUNT
-----	-----	---	---	---	-----
CDB\$ROOT	READ WRITE	NO	NO	NO	2
PDB\$SEED	READ ONLY	NO	NO	NO	0
PDBDEV	READ WRITE	NO	NO	NO	0

Application Containers Demo 1: Create Application Root (2:12)

```
CREATE PLUGGABLE DATABASE <pdb_name>
AS <APPLICATION CONTAINER | SEED>
ADMIN USER <admin_user_name> IDENTIFIED BY <password>
[ROLES = (<comma_delimited_list_of_roles>)]
[PARALLEL <integer>]
[DEFAULT TABLESPACE <tablespace_name>]
[<pdb_storage_clause>]
[<file_name_convert_clause>]
[<service_name_convert_clause>]
[<path_prefix_clause>]

Disconnected from Oracle Database 12c Enterprise Edition Release 12.2.0.1.0 - 64bit Production
[oracle@vbgeneric ~]$
```

Application Containers Demo 4: Create Seed (4:4)

- On dissecting the pdb_to_apppdb.sql script the following was identified as the root cause of the error

```
SQL> SELECT /*+ OPT_PARAM('_ENABLE_VIEW_PDB', 'FALSE') */ name
  2   FROM v$pdb
  3  WHERE proxy_pdb='NO';

NAME
-----
UWAPP_ROOT
UWAPP_ROOT$SEED
```

- Further examination of the script(s) found numerous examples of this

```
select TO_NUMBER('NOT_IN_APPLICATION_PDB') from v$pdb
where con_id=sys_context('USERENV', 'CON_ID') and application_pdb<>'YES';
```

- Clearly the script has no choice but to fail
- More news on this in our Slack group as it becomes available

SQL*Net

TNSNAMES Configuration

- Every time you add a new PDB ... you must also make a manual entry to TNSNAMES.ORA

```
# tnsnames.ora Network Configuration File:
C:\app\oracle\product\12.1.0\dbhome_1\network\admin\tnsnames.ora
# Generated by Oracle configuration tools.

PDBDEV =
  (DESCRIPTION =

```

Lockdown Profiles

Lockdown Profile Enhanced Security

- Lockdown profiles compliment to GRANTs
- GRANTs, alone, are all or nothing
- A Lockdown Profile makes a system permission grant more granular

```
SQL> CREATE LOCKDOWN PROFILE devel_pdb;

Lockdown Profile created.

SQL> ALTER LOCKDOWN PROFILE devel_pdb
  2  DISABLE STATEMENT=('ALTER SYSTEM')
  3  CLAUSE=('SET')
  4* OPTION ALL EXCEPT = ('plsql_code_type, plsql_debug, plsql_warning');

SQL> ALTER SYSTEM SET pdb_lockdown = 'DEVEL_PDBS' SID='*' scope=BOTH;

System altered.

SQL> show parameter lockdown

NAME                TYPE        VALUE
-----
pdb_lockdown        string      DEVEL_PDBS

SQL> ALTER SESSION SET CONTAINER=PDBDEV;

Session altered.

SQL> ALTER SYSTEM SET pdb_lockdown = 'DEVEL_PDBS' SID='*' scope=BOTH;

System altered.

SQL> GRANT alter system TO pdb_user;
```

Built-in PL/SQL Objects

12.1 DBMS_PDB (1:2)

- Provides an interface to examine and manipulate data about pluggable databases
- Subprograms
 - CHECK_PLUG_COMPATIBILITY
 - DESCRIBE
 - RECOVER
 - REMOVE_LINK
 - SET_DATA_LINKED
 - SET_EXT_DATA_LINKED
 - SET_METADATA_LINKED
 - SET_PROFILE_EXPLICIT
 - SET_ROLE_EXPLICIT
 - SET_USER_EXPLICIT

12.1 DBMS_PDB (2:2)

```
conn / as sysdba

ALTER PLUGGABLE DATABASE pdbdev CLOSE;

ALTER PLUGGABLE DATABASE pdbdev OPEN READ ONLY;

exec dbms_pdb.describe('/home/oracle/pdbdev.xml', 'PDBDEV');

BEGIN
  IF dbms_pdb.check_plug_compatibility('/home/oracle/pdbdev.xml', 'PDBDEV') THEN
    dbms_output.put_line('TRUE');
  ELSE
    dbms_output.put_line('FALSE');
  END IF;
END;
/

SELECT *
FROM pdb_plug_in_violations;
```

12.1 DBMS_PDB_EXEC_SQL

- Stand-alone stored procedure
- Calls DBMS_PDB.EXEC_AS_ORACLE_SCRIPT
- Executes a statement as an Oracle Script

```
CREATE OR REPLACE NONEDITIONABLE PROCEDURE sys.dbms_pdb_exec_sql(sql_stmt IN VARCHAR2) AS
BEGIN
    dbms_pdb.exec_as_oracle_script(sql_stmt);
END;
/
```

```
-- $ORACLE_HOME/rdbms/admin/catadmprvs.sql

@@?/rdbms/admin/sqlsessstart.sql

alter session set "_ORACLE_SCRIPT"=true;

-----
-- Grant required privileges to administrative users
-----
-----
-- SYSBACKUP
-----
-- To perform backup and recovery tasks.
GRANT alter database                TO sysbackup;
GRANT alter session                 TO sysbackup;
...
@@?/rdbms/admin/sqlsessend.sql
```

12.2 DBMS_PDB_ALTER_SHARING

- This package can set a database object to one of the following types of common objects in a PDB: data-linked object, extended data-linked object, or metadata-linked object
- An application can be migrated to CDB\$ROOT or to an application PDB. For example, an application can be migrated from an application installed in a PDB plugged into a 12.1 CDB to a PDB in a 12.2 CDB
- Subprograms
 - REMOVE_LINK
 - SET_DATA_LINKED
 - SET_EXT_DATA_LINKED
 - SET_METADATA_LINKED
 - SET_PROFILE_EXPLICIT
 - SET_ROLE_EXPLICIT
 - SET_USER_EXPLICIT

```
exec dbms_pdb_alter_sharing.set_metadata_linked('C##UWCLASS','ACCOUNTS', 1);
```

12.2 DBMS_SYNC_REFRESH (1:2)

- Synchronous refresh is a refresh method introduced in Oracle Database Release 12c to enable synchronizing a set of tables and dependent materialized views
- Subprograms
 - ABORT_REFRESH
 - ALTER_REFRESH_STATS_RETENTION
 - CAN_RESYNC_TABLE
 - EXECUTE_REFRESH
 - GET_ALL_GROUP_IDS, GET_GROUP_ID, GET_GROUP_ID_LIST
 - PREPARE_REFRESH
 - PREPARE_STAGING_LOG
 - PURGE_REFRESH_STATS
 - REGISTER_MVIEWS
 - REGISTER_PARTITION_OPERATION
 - UNREGISTER_MVIEWS
 - UNREGISTER_PARTITION_OPERATION

12.2 DBMS_SYNC_REFRESH (2:2)

Value	Description
1 to 365,000	Valid range in days
0	Refresh history not saved by PREPARE_REFRESH
-1	Refresh history not purged by PREPARE_REFRESH
NULL	Return to default value (31)

```
col parameter_name format a35
col str_value format a20

SELECT *
FROM syncref$_parameters;

exec dbms_sync_refresh.alter_refresh_stats_retention(90);

SELECT *
FROM syncref$_parameters;
```

Conclusion

Conclusion

- Read the 12.2 docs
 - Download the installation files
 - Install it
 - Learn it
-
- For demos that work in SQL*Plus

The screenshot shows a Mozilla Firefox browser window with the address bar displaying `docs.oracle.com/en/database/`. The page title is "Database Documentation - Oracle Database - Mozilla Firefox". The browser's address bar shows the URL and a search icon. Below the address bar, there are several search engines listed: DuckDuckGo, Google, meta7, humor, news, oracle, scitech, and Headlines. The Oracle Help Center logo is visible in the top left corner, and a welcome message "Welcome Daniel Sign Out" is in the top right corner. The main content area features a search bar with the text "Search for..." and a magnifying glass icon. Below the search bar, there is a navigation menu with "Help Center Home" and "Oracle Database". The "Oracle Database" section is expanded, showing "Related Products" and "Other Databases". The "Other Databases" section lists "NoSQL", "MySQL", "TimesTen In-Memory Database", "Database Mobile Server", "Berkeley DB", "Database Express Edition", "Java DB", "Rdb", and "Essbase". The main content area displays the "Database Documentation" title, followed by a paragraph describing Oracle's solutions. Below this, there is a section titled "Oracle Database" with a dropdown menu showing "Oracle Database 12c Release 2 (12.2)". The "Learn About Oracle Database" section includes links for "Get Started", "What's New", and "Oracle Live SQL". The "Common Tasks" section includes links for "Install and Upgrade", "Administration", and "Development". A green circular icon with a white document symbol is positioned to the right of the "Database Documentation" title. A purple circular badge with the number "1" is located in the bottom right corner of the page.
